Extension:

If you were a coach and had to buy equipment for your team to use at training, what would you buy?

Use the clues to help you:

- There are 18 players in the team
- The coach needs at least one ball for every pair.
- To run the training you need cones, two sets of portable football posts and training bibs in two different colours
- A whistle helps the coach to get everyone's attention.

How much would it cost? Justify your thinking and show your working out.
